Course Overview

Green Goose is a short term trading system that takes advantage of an overnight gap. It was developed in October 2016 and presented in OptionPlayers.com's first course on options trading. Since its introduction, more than 800 OP members have been through the "GG" course; it has been traded continuously since introduction. Many of the course graduates participate in a private chat where the instructor provides daily signals and entry/exit guidance. This version has been refreshed and is targeted to students that want to learn the basics of the Green Goose System along with its sub systems (Grey Goose & Flying Goose).

Course Fee

\$495.00

This course is designed to provide an in depth look at the how, why, when, and where of the Green Goose System. Parallel to the core subject matter, the instructor will provide the rules to and trade the Green Goose overnight system as attendees "look over his shoulder." Layers of the system will be revealed each session. At the end of the course, members will have seen the complete system, its rules, advantages, and disadvantages and may begin trading it if they so choose. Participation in the private GG chat and a monthly live refresher will be offered for 1 month, after which a nominal monthly fee of \$12.95 is requested.

Previous courses have run Green Goose on AAPL, FB, SPY, IWM, and EEM. The following results and equity curve for Green Goose from April 1 to August 19, 2021 are as follows (considers \$500 position size per trade)

83 overnight trades

Win / Loss Ratio : 61.45%

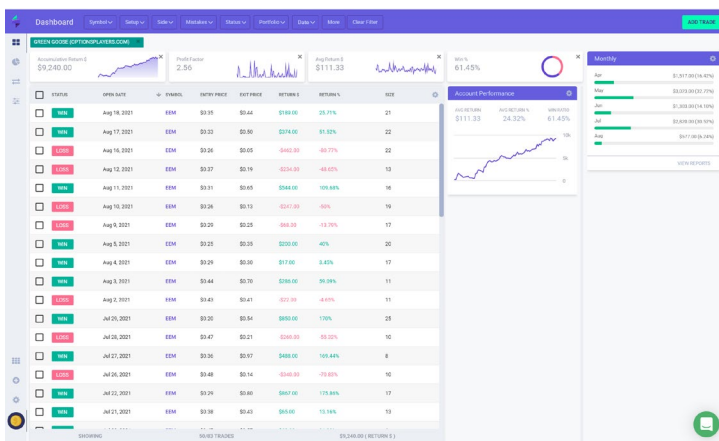

Profit Factor : 2.56

Cumulative Return : \$9,240 (excluding commission)

Resources

- A good charting package is required, e.g., TradingView, TC2000, TOS, etc... The instructor will use TradingView for this course and will provide the GG system scripts at the end of the course.
- Subscription to [TraderSync](#), a powerful cloud based trade journaling package is strongly recommended.

- Subscription to TomsOptionTools, an options analysis package that allows you to build spreads, butterfly's, calendars, collars, etc... and back test strategies is optional.

The screenshot shows the Tom's Tools website interface. At the top, there is a navigation menu with links for Home, Stocks, Options, Trades, Web Site, Searchers, and Help. Below the menu is the TTR logo (Tom's Trading Room) and the text "Tom's Tools". To the right of the logo are buttons for "HELP ??", "Tom's Tools", and a date selector showing "Stock Date: 2021 / 08 / 19", "Update Stock Date:" with a "GO" button, and "Latest Date: 2021-08-19 17:33 EST" with "Prices Delayed 15+ mins".

Below the navigation is a welcome message: "Welcome ricepirate01 (1.34 Days to go)". The main content area is divided into four columns:

- OPTION TRADER:** Contains buttons for "GET STARTED", "Option Tools", "Crypto Tools", and "Moving Averages".
- CONTRARIAN TRADER:** Contains buttons for "Darknet Spreads", "Weekly Cash Clock", and "TOM'S Newsletter".
- COMPLETE TRADER:** Contains buttons for "THE MONEY CALENDAR", "Money Holidays", "Money Calendar App", and "Money Clock".
- PARTNERS & MASTERS:** Contains a "Partners" button, an image of a piggy bank, and an "EMAIL" button with the text "support@tomgentile.com for info on access to Premium Tools".
